The Open Gate

A HAPPY EASTER TO EVERYONE

The Open Gate is a choice that God is always placing before us. It is a sign of the opportunity that is ours. We can choose to go that way, or to ignore it and to go along other paths. We should look upon the gate as a way to extend ourselves and our vision. Here we can see further and reach beyond where we have been before.

It may take a great deal of discipline to get off the old familiar track and to break old habits, but in return, it offers the excitement of new grounds and new vistas. What we have to learn is to recognise when an open gate is presented to us.

There are many gates, physical, mental and spiritual through which we can travel to the 'other world' or, as I would prefer, 'to a greater vision of this world of ours.' There are always deeper levels of reality to explore. To accept open gates is to accept the role of a frontiers-person; an adventurer going where no one has gone before.
